Tugas ASD / Queue

1. Write the algorithm of queue mechanism using
   - Single linked list
   - Array alternative 1
   - Array alternative 2
   - Array alternative 3
2. Use the same infotype as before
3. Each member is to write 1 mechanism

Jawab :

Single linked list Algoritma:

- Simpan 2 reference: front → … → … →back enqueue(Benda x):
  - ❖ Buat sebuah node baru N yang datanya x
  - ❖ if queue sebelumnya empty, maka front = back = N
  - ❖ else tambahkan N di akhir (dan update back)
- dequeue():
  - ❖ Hapus elemen pertama: front = front.next

· Array alternative 1 Algoritma :
